

		HW 0908	HW 0924	HW 1020	HW 1029	HW 1124	HWa 1211	HWb 1211	So Far	Totals	
1	Appreciate and express the art and science of interaction design, including its theories, principles, methodologies, and role in software design and development.									+	0
1a	Understand and express how interaction design relates to mental models.			/							6
1b	Understand and describe core interaction design concepts: usability metrics; interaction design guidelines, principles, & theories; interaction styles; and affordances & natural mappings.		/	/					/	/	5
2	Understand and report on how humans behave and interact with the user interfaces of real-world systems and software.									-	1
2a	Conduct and document a real-world study of how a cohort of users responds to a particular user interface, including but not limited to capturing and prioritizing usability metrics and correlating results to mental models and interaction design theories.		/	-					/	O	0
2b	Effectively use: usability metrics; interaction design guidelines, principles, & theories; interaction styles; and affordances & natural mappings to make appropriate, well-founded interaction design decisions.		/	/					/		
3	Demonstrate the fundamentals behind designing and implementing user interfaces.										
3a	Know and understand how user interfaces are constructed, especially the model-view-controller (MVC) paradigm.										
3b	Know and understand event-driven programming.				/				/		
4	Follow academic and technical best practices throughout the course.										
4a	Write syntactically correct, functional code.										
4b	Demonstrate proper separation of concerns, especially MVC.				-				-		
4c	Write code that is easily understood by programmers other than yourself.				/				/		
4d	Use available resources and documentation to find required information.	+	+	/							
4e	Use version control effectively.		/	+							
4f	Meet all designated deadlines.		+	+	/
